Art Unit: 3641

- 1. Receipt is acknowledged of the amendment filed on 10-24-2003.
- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 22-30, 32, 34, 35 and 37-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over British publication 1, 257, 827 in view of Kroeker et al.

See Fig. 2 -- flow control valves 48 and check valves. The valves are adjustable via adjustment screws 52.

The flow in conduit D is controlled via valves 48.

The claimed invention differs only in the type of control valves.

Kroeker et al. show adjustable control valves having discrete user selectable settings in a shock absorber (note valves 88, 90).

It would have been obvious to one of ordinary skill in the art to have utilized manually adjustable valves in the shock absorber of Publication '827 in view of the teaching of Kroeker et al. so as to provide greater control of the shock absorber such as taught by Kroeker et al.

As per applicant's comments, the valves 48 are adjustable via screws 52.

4. Any inquiry concerning this communication should be directed to Mr. Graham at telephone number (703) 308-1113.
